

Important information about investment managers and trading practices

Wealth
Management

This document provides important information regarding the RBC Wealth Management (“RBC WM”, “we,” “us,” or “our”) Consulting Solutions program, a separately managed account wrap fee program (“Program”).

Current and prospective RBC WM Program clients (“client(s)”, “you” or “your”) should fully understand the trading practices employed by RBC WM and investment managers available through the Program.

RBC Wealth Management Consulting Solutions program

In the Consulting Solutions program, client accounts are managed by one or more professional investment managers participating in the Program. Investment managers available through the Program exercise discretion. These investment managers exercise discretion by not only creating and maintaining an investment portfolio, but also selecting the broker/dealer(s) they execute trade orders with. Once a trade order has been filled, the investment manager provides instructions for the allocation of shares to client accounts. Clients may provide instructions to the investment manager to direct all orders for their account to a specific broker/dealer.

Best execution obligations

As investment advisers registered with the Securities and Exchange Commission (“SEC”), investment managers have a fiduciary obligation to seek “best execution” of client trade orders. In meeting this obligation, an investment manager

must execute securities transactions for clients in such a manner that the client’s total cost or proceeds in each transaction is the most favorable under the circumstances. In assessing whether this standard is met, an investment manager should consider the full range and quality of a broker/dealer’s services when placing trades with them. These considerations may include, but are not limited to: price/yield competitiveness, execution capability and quality, commission rates, market impact, financial responsibility, operational efficiency, responsiveness to the adviser, knowledge of the relevant asset class/sector/specific security in which the adviser is transacting business, and other factors, as deemed appropriate. An investment manager fulfills its duty of best execution not by obtaining the best price or the lowest commission rate, as is often assumed to be the case, but rather, by establishing and maintaining a process through which the investment manager assures that it is giving due attention to each of the many factors affecting the quality of execution of client trades. Additionally, the perceptions of what

constitutes best execution in any given instance may vary.

Trade aggregation and rotation practices

Investment managers may participate in other wrap fee programs sponsored by firms other than RBC WM. In addition, investment managers may manage institutional and other accounts not part of a wrap fee program. Frequently, investment managers place orders to purchase or sell the same security for a number of clients invested in a particular investment strategy. Instead of effecting similar trades through a number of different broker/dealers, an investment manager may decide to aggregate such trades into a block trade that is executed through one broker/dealer. This practice may enable the investment manager to obtain a more favorable execution than would otherwise be available if the trades were not aggregated. As an aggregated order is executed, securities are allocated to clients in a fair and equitable manner over time, taking into consideration the interests of each client. Using

Investment and insurance products offered through RBC Wealth Management are not insured by the FDIC or any other federal government agency, are not deposits or other obligations of, or guaranteed by, a bank or any bank affiliate, and are subject to investment risks, including possible loss of the principal amount invested.

block trades may also assist the investment manager in potentially avoiding an adverse impact on the prices of a security that could result from simultaneously placing a number of separate, successive or competing trades.

Alternatively, an investment manager may utilize a trade rotation where one group of clients may have a transaction effected before or after another group of the investment manager's clients. Clients should be aware that an investment manager's trade rotation practices may at times result in a trade being effected for a client's account that occurs near or at the end of the investment manager's rotation and, in such event, the client's trade will significantly bear the market price impact, if any, of those trades executed earlier in the investment manager's trade rotation, and, as a result, the client may receive a less favorable net price for the trade.

Additional information regarding an investment manager's trade aggregation and rotation practices may be found in the investment manager's Form ADV Part 2A.

Investment managers and trading away

If investment managers trade away from RBC WM with other broker/dealers, you should understand that commissions, mark-ups, spreads, and other transactional charges for transactions not effected through RBC WM are charged to you by the executing broker/dealer, whereas the

Program fees assessed by RBC WM covers these costs when the trade is effected through RBC WM. The executing broker/dealers net these commissions, mark-ups, spreads and other transactional charges into the purchase or sale price of the trades and would not be delineated from the purchase or sale price found on your RBC WM trade confirmation, monthly transaction summary or statement. RBC WM does not restrict an investment manager's ability to trade away, as the responsibility to determine the suitability of trading away from RBC WM falls under the investment manager's expertise in trading the securities in their portfolio and their individual fiduciary duty to you. RBC WM does not evaluate whether an investment manager is meeting its best execution obligation when trading away. You should understand that RBC WM is not a party to transactions that are traded away from RBC WM and we are not in a position to negotiate the price or transaction related charge(s) with the executing broker/dealer.

Some investment managers have historically executed nearly all client trades with broker/dealers other than RBC WM. Some investment managers have executed some, if not all, trades that were a result of changes to their investment strategies with firms other than RBC WM while executing most, if not all, account maintenance trades (ex. trades need to invest a deposit or generate cash for withdrawal) with RBC WM. In some situations, trades done away from RBC WM are executed by other broker/dealers

without any additional commissions, mark-ups, spreads and other transactional charges. However, in other situations, commissions, mark-ups, spreads and other transactional charges may be assessed. These costs are in addition to the Program fee paid to RBC WM. As a result investment managers who execute trades with broker/dealers other than RBC WM may be more costly to clients than investment managers who primarily submit trades to RBC WM for execution. Clients should review the investment manager's Form ADV Part 2A for more information related to an investment manager's trading practices and consider this information carefully before selecting an investment manager. In particular, clients should carefully consider any additional trading costs they may incur before selecting an investment manager to manage their account.

The table on the next page, that includes data supplied to us by each investment manager that traded away from RBC WM in calendar years 2019 and 2020, reflects the frequency and number of trades done away from RBC WM as well as the additional cost of these trades, if any. The information provided below is based solely on what each investment manager provided to RBC WM. This data has not been independently verified by RBC WM. Please note that the information provided reflects historical data and may not be indicative of the current trade away frequency, amount of trades or cost of these trades.

Please note that this table does not include managers available in the Consulting Solutions program that did not tradeaway from RBC WM in calendar years 2019 and 2020.

- ¹ Additional cost is expressed in terms of cents per share (“cps”) unless otherwise indicated. In some instances, the additional cost is expressed in terms of an average of basis points (“bps”).
- ² Strategy transitioned to RBC Unified Portfolio, RBC Wealth Management’s Unified Managed Account program, on March 31st, 2019. Strategy no longer available in Consulting Solutions.
- ³ Brandes:
- For securities executed in U.S. and Canada markets commissions are cents per share (cps)
 - For securities executed in other markets commission are in basis points (bps)
- ⁴ Kirr Marbach: Strategy removed from the Consulting Solutions program on March 31, 2020.
- ⁵ Marshfield: There were no step outs for equity transactions in 2019. The step out trades done in 2019 were treasury bills and treasury notes maturing within 3 months. Treasury bills and notes are purchased for accounts as cash management. All of these trades were done competitively and no commission or additional charges were incurred by any client participating in the trades.
- ⁶ Marshfield: There were no step outs for equity transactions in 2020.
- ⁷ Oakridge: Strategies removed from the Consulting Solutions program on January 31, 2020
- ⁸ RiverFront: For many, if not all Trade Away Transactions, there will likely be no disclosed markup/markdown. In these instances, the undisclosed markup or markdown is netted into the price the client receives. Since the executing broker does not provide data to us regarding the dollar amount of the markup or markdown in these instances, we cannot disclose an amount to the client, and will list “0” in this column until such time as we are able to provide additional information, if any. These types of trades include, but are not limited to, transactions in shares of ETPs in which an Authorized Participant or market maker is providing RiverFront with a two-sided market for execution. Once a trade is complete, however, we will send a written request to the executing broker to confirm, in writing, trade information, including markup/markdowns. To the best of our ability, therefore, we will seek to obtain and provide to clients the markup/markdowns disclosed to us from the executing broker, either through trade confirmations or in other written form. Please see <http://www.riverfrontig.com/advisors/wrap-fee-trading-disclosures/> for more information on RiverFront’s wrap fee trading disclosures.
- ⁹ Thornburg: Additional cost figure is the average of broker commission, ADR conversion and local market fees.
- ¹⁰ Thornburg: Thornburg received a 5 cps credit from the ADR depository when LSRCY was created. The commission charged by the executing broker was approximately 2 cps netting to 3 cps credit to the client.

Please note that this table does not include managers available in the Consulting Solutions program that did not trade away from RBC WM in calendar years 2019 and 2020.

- ¹¹ Appleton: Strategy added to Consulting Solutions program in 2020.
- ¹² Belle Haven: Strategy added to Consulting Solutions program in 2020.
- ¹³ Belle Haven: We will trade away 100% of the time as we utilize our own broker/dealer to execute trades, which has allowed us to provide best execution as we do not charge mark-ups, mark-downs or commissions.
- ¹⁴ Cincinnati: Trades are aggregated and executed on an institutional, or net, basis. Bid/ask spread is the only source of compensation.
- ¹⁵ GW&K: GW&K believes that there are no additional explicit costs for client's step-out trades in fixed income securities. As GW&K is an investment advisor and not a broker/dealer, we do not receive any economic benefit from trading activity, nor do we directly control the degree of mark-up or mark-down that may be applied by brokers we engage on behalf of our fixed income clients. That said, we have high conviction that our greatest opportunity to achieve best execution in municipal and taxable bond trading is to leverage institutional trading relationships, aggregate trade volume influence, regional and sector expertise, and other factors made available through having discretion over such transactions. Moreover we believe, through trading large blocks of bonds with institutional trading partners when compared to what most program sponsor desks may execute in smaller increments, perhaps even on an account-by-account basis, GW&K is not only not adding additional cost, but that clients are benefiting from our trading expertise and paying less.
- ¹⁶ Loomis Sayles: Loomis Sayles is responsible for identifying bonds that best fit its fixed income taxable and municipal bond strategies. Every bond that trades in the market has a "bid/ask spread." When Loomis Sayles steps out a trade for a bond to a dealer, it is buying the bond for the client at the "ask" price and selling the bond at the "bid" price. The difference between the "bid" and "ask" prices is the "spread." This spread which is imbedded in the net price and is not disclosed by the dealer, could be viewed as an additional imbedded cost that a client may incur. However, the client would incur this spread regardless of whether Loomis steps out the trade to another dealer or executes the trade through sponsor/custodian.
- ¹⁷ Madison: 100% of the trades we conducted during 2019 and 2020 for Consulting Solutions program accounts invested in our fixed income strategies were executed as step-outs to avoid conflicts with principal/agency status of sponsor firms and to ensure best execution for clients. When we step-out trades for fixed income accounts, trading lists are sent to multiple dealers in order to get best execution. Dealers are not paid a fee for bond transactions, but instead are compensated by the bid/ask spread. As such, there are no additional costs beyond the bid/ask spread that are charged as a result of step-out fixed income transactions. We seek to buy/sell full positions, but markets occasionally require us to buy/sell partial positions. In such cases, allocation post-trade occurs and we will apply securities/proceeds pro rata across effected accounts. By aggregating the purchases or sales of a broader base of clients, including those who use other brokers and/or custodians, we may be able to find additional bonds available in larger blocks, resulting in better overall prices.
- ¹⁸ McDonnell: McDonnell merged with Loomis Sayles in 2019. McDonnell Government/Credit SMA strategy terminated at the time of the merger with Loomis Sayles in 2019. Information report for strategy is through July 1st, 2019.
- ¹⁹ McDonnell: McDonnell is responsible for identifying bonds that best fit its fixed income taxable and municipal bond strategies. Every bond that trades in the market has a "bid/ask spread." When McDonnell steps out a trade for a bond to a dealer, it is buying the bond for the client at the "ask" price and selling the bond at the "bid" price. The difference between the "bid" and "ask" prices is the "spread." This spread which is imbedded in the net price and is not disclosed by the dealer, could be viewed as an additional imbedded cost that a client may incur. However, the client would incur this spread regardless of whether McDonnell steps out the trade to another dealer or executes the trade through sponsor/custodian.
- ²⁰ Nuveen: Where Nuveen Asset Management trades away, clients generally incur transaction costs and fees in addition to the wrap fee. These fees are generally in the form of mark-ups and mark-downs, or spreads, earned by the relevant securities dealer (not Nuveen Asset Management or a Nuveen affiliate) in addition to the wrap fee payable to the wrap program sponsor.
- ²¹ Nuveen: Where Nuveen Asset Management trades away, clients generally incur transaction and other costs and fees in addition to the wrap fee. These fees are generally in the form of mark-ups and mark-downs, or spreads, earned by the relevant securities dealer (not Nuveen Asset Management or a Nuveen affiliate).
- ²² Western: Strategy added to Consulting Solutions program in 2020.
- ²³ Western: Information provided excludes SMASH mutual funds. SMASH mutual funds were traded directly with RBC Wealth Management and as such no additional trading costs were incurred.
